One of the biggest changes to help us build better drawings. New documentation templates, improved annotating tool and improved notes for tables, names and other drawing objects. • New documentation templates — Use these templates to build better-designed documentation. • Improved annotations — They're always on top and now you can create custom annotations that are perfectly aligned to your drawing. • Improved Notes and Table tool — You can customize how you use these and mark up data in your drawings. • New in the Annotations and Comments toolbox, you can now edit your annotation styles and make annotations with your own colors and patterns. • The Text tool now has all the same options as the Table tool, including fixed and variable widths and you can choose the text color. You can also now draw text over symbols in your drawings. • Improved 3D editing — Working with 3D drawings has never been easier. • New on-the-fly drawing parameterization tool — Turn 2D drawings into parametric surfaces and use the tools to simplify complex geometry. • Printing and file transfer — Generate thumbnails for print-ready or PDF files and export to file or network drive to quickly send your document to your coworkers. • Experimental rendering features — Let you experiment with new rendering features, like rendering a mirror image of your drawing. • Export 3D to pdf — 3D drawings can now be exported to pdf format.
