Extensions of the drawing and model data can be imported or exported as drawings or models. There are many 3rd-party tools that work with the.dwg or.dxf file format. Autodesk MotionBuilder supports several APIs for object-oriented programming. First, there is the VisPEN API. VisPEN is a non-visual programming language for AutoCAD Cracked Version, also known as "dwgScript". It is included in every copy of AutoCAD. The second tool is the STEP-Part API, which is used to program AutoCAD applications to run on Windows. If you are a developer, you can create your own plugin for AutoCAD or create a COM (Component Object Model) ActiveX control. If you are a user, you can create your own macro,.rtf, or.txt file for AutoCAD. The AutoCAD Utilities Library (AUL) supports the exchange of data with other programs, such as Microsoft Excel. Using XML, a user can create and store macros for AutoCAD. Since AutoCAD 2007, AUL's XML format is standard (XML Schema). Java A Java API named JAutoCAD has been available since AutoCAD 2006. According to a release note of AutoCAD version 2014, JAutoCAD is deprecated. SQL To store and retrieve design data in a relational database, including for Access databases, a stand-alone SQL database such as Microsoft SQL Server or MySQL is typically used. To save design data in SQLite, in addition to AUL, an application can be written. API AutoCAD supports a number of APIs for customization and automation. These include AutoLISP, Visual LISP, VBA,.NET and ObjectARX. ObjectARX is a C++ class library, which was also the base for: products extending AutoCAD functionality to specific fields creating products such as AutoCAD Architecture, AutoCAD Electrical, AutoCAD Civil 3D third-party AutoCAD-based application There are a large number of AutoCAD plugins (add-on applications) available on the application store Autodesk Exchange Apps. AutoCAD's DXF, drawing exchange format, allows importing and exporting drawing information. Extensions of the drawing and model data can be imported or exported as drawings or models. There are many 3rd-party tools that work with 5b5f913d15

What's New in the?

A new AutoCAD command, "Create Viewports," saves time and enhances usability when switching between current and previous views. Save time by opening and closing viewports without missing your active view. (video: 4:37 min.) Manage multiple layers using the new Custom Layers feature. Not only can you add and name your own layers, but you can also use layer styles. Customize your Layers menu to suit your workflow. (video: 2:27 min.) New features and enhancements in the Windows and Mac clients Desktop Scaling: Use up to 4-times the area of a default screen, or display 1:1, 1:2, 1:3, or 1:4 on any compatible device, monitor, or projector. Easily configure screen sizes to keep you connected and organized. (video: 1:13 min.) Shift and enter arrow keys on trackpads and mice: Increase productivity by pressing the Shift key on your keyboard while typing in text fields, for increased accuracy and fewer missed keystrokes. (video: 1:13 min.) Space-Saving: Drawing, editing, and navigating in familiar space. Spacebar shortcuts improve productivity and increase visual engagement. For example, use the Spacebar to Zoom, Pan, and select objects, and then move your cursor with the Arrow Keys or by typing the equivalent menu or toolbar shortcut. (video: 1:14 min.) Automatic Object Snapping: Create drawings faster with Dynamic Snapping, a feature that automatically detects the closest matching objects. (video: 1:02 min.) New Features and Enhancements in the CADDY Client In the CADDY Client, the Project Manager has new dropdown boxes to simplify navigation in the design package. From File > Open, you can now choose to open a design package directly from a folder. From File > Create, you can now choose to create a design package from a folder. GOTO command on the ribbon also lets you open the Project Manager. Make your job as easy as possible. Use the Ribbon Tools menu and the new toolbar menu to launch and run commands, toggle views, and change settings. Share, save, print, and export designs quickly. The built-in Ribbon, Project Manager, and web-based CAD tool offers features for sharing, saving, printing, and exporting a design package.
