KeyMacro can set up hotkeys in MacOS. It is a must-have tool for multimedia programmers and users who need to set up dozens of hotkeys for various tasks in various applications. KeyMacro enables you to setup your own actions and procedures for operating MacOS applications. It is a tool for multimedia programmers and users to define their own actions and procedures. Features of KeyMacro: [?](#) Setup a hotkey to run an app [?](#) Play and stop DVD [?](#) Record and playback DVD [?](#) Open, close, minimize and restore an app [?](#) Go to specific area of an app [?](#) Create and delete files [?](#) Create and delete directories [?](#) Hide and unhide apps [?](#) Create shortcuts [?](#) Change volume of playback, recoding and speaking [?](#) Set app's preference [?](#) Automatically open the app, then switch the workspace [?](#) Export and import procedures [?](#) E-Mail or sms user to do specific task [?](#) Automatically update imported procedures [?](#) Turn on/off auto update mode KeyMacro has many advantages and some limitations: [?](#) [?](#) Many different users set up their own functions of operation, and it is not similar. [?](#) [?](#) The exported procedure is different from the imported procedure, and there is no relation. [?](#) [?](#) For each user, the exported procedures and imported procedures should be in the same place. [?](#) [?](#) The importing and exporting procedures should be easy to do. [?](#) [?](#) After each use, the user can have the ability to find the error and edit it. [?](#) [?](#) Without using a mouse, a program can be operated. [?](#) [?](#) For a beginner, KeyMacro is a good choice because the user can change the procedures and can have a "go-to" function of operation. [?](#) [?](#) For an advanced user, KeyMacro is a good choice because the user can set up many hotkeys for operations and can use a mouse to quickly do tasks.
