Trends, opinions and heirloom seedstock (Ötügen ve alternatif) are collected in an internet survey. The latest instalment (35th) was completed in. · 2017 · 10 min to read · Top 200 · No votes · Show more 0 1 · 0. It seems to be well received by the Swedish media. A later survey in the same year, 2014, included more than 250 respondents. Other surveys have been conducted in 1990, 1998, 2003 and 2015. The results of the 2005 survey on national energy and climate policies were published in 2010. The "Hjärtat på känder" ("The heart at the climate wheel") project, started in 2008 and completed in 2011, aimed to understand what young people think and feel about environmental challenges and propose measures to mitigate the impact on their lives. The project was carried out under the administration of the Swedish Environmental Protection Agency. The project was led by Professor Pehr Skoglund from the Department of Environmental and Social

Sciences at the University of Gothenburg. Other researchers participating in the project were Tom Schultz and Robert Cederberg. Another of the project researchers, Dr. Eva-Christina Löfvenghagen from the University of Gothenburg, is quoted in the article "Global Warming Impacts the Work of Young Women and Girls". The results of the "Climate and energy policies in Swedish life" survey, started in 2008 and completed in 2012, confirmed that people think that global warming, and related environmental challenges, have been high on the government's agenda during the years. There are also differences in opinion between people with different backgrounds and demographics. The 2015 assessment of the risk of our climate, environment and societies shows that it is essential to act now to reduce climate risks. Many people agree that it is too late to delay positive measures to mitigate climate and environmental challenges. The National Board of Housing, Spatial Planning, and Environment has been commissioned by the Swedish Ministry of the Environment to monitor the implementation of the recommendations made in the report "Climate, Energy and Society" published by the National Board of Housing, Spatial Planning, and Environment. The report was issued in September 2015 and the study is conducted by Ludvig Söderberg. The National Board has established a website at www.climate-energy.se for the purpose of publishing the results. Over the years, the University of Gothenburg has conducted studies on the impact of global warming on the world's 82138339de
