photographs. Select and customize pictures The interface of the application is pretty intuitive and starts off with a pop-up dialog that allows you to select one of the two available modes: Standard Mode (recommended for experienced users) or Wizard Mode (designed for novice users). A project is created by adding any number of photos and audio tracks. Once you have imported your images, you can edit each one by adjusting transition effects, displaying and positioning clock or slide numbers. You can enter information details such as the project's name, author, email or URL address and display text messages on start-up or upon exiting the slideshow presentation. Wide array of customization features For each or all

selected slides, you can set pause, add notes using substitutes to text, include logos, select a background image or instead choose the desired color from a built-in palette. You can choose the preferred fade in or fade out effect and preview the changes without pause by clicking the “Test” button. Pictures Slideshow Maker supports various audio formats, such as WAV, AC3, MPA, MP2, MP3 or OGG. Create screensavers and video files Besides creating slideshows, the program helps you build screensavers and executable files that include in a single package all the used pictures and music files. Furthermore, you can burn your recently created SCR or EXE files to a CD or DVD. Another useful feature is that you

can make videos using the same photos and settings you used when creating slideshows. Plus, you can enhance the video and audio quality by adjusting the bit rate, aspect ratio or by selecting the proper codec. Conclusion To sum things up, Pictures Slideshow Maker offers a handy set of tools that help you create slideshow presentations, screensavers, video and executable files. Pictures Slideshow Maker

MouseTool is a powerful and user-friendly application designed to perform all your mouse functions in a single window. The program works on Windows XP and above and can be used on multi-monitor setups. The program lets you perform more than 20 actions, including standard mouse actions such as copying the current mouse cursor location, moving the cursor to a specific location, scrolling up and down through pages, etc. The program can

move the mouse pointer to any predefined location and can control other mouse actions, such as selecting text and shortcuts. In addition, you can configure the program to bring up specific windows on your screen, show the menu bar, quickly launch programs, and many more. The program also lets you execute multiple actions at once, which is great when you need to perform several actions at once, such as copying several file paths and pasting them all at the same time. The tool can also be used to quickly copy the current mouse cursor location and paste it to other location on your screen, or to set the active window to one particular monitor. In addition to the mouse actions, MouseTool also lets you create

shortcuts using the program's Widget function. The program can launch specific programs, launch files, open web pages, open folders, and much more. The program has been designed to be simple to use, which makes it a highly
