Oct 3, 2015 - Coub is a YouTube video looping tool. You can take any video, trim the best part, combine it with other videos, and add a soundtrack. This method is somewhat similar to Coda, but it has a number of limitations. First of all, you'll need a fairly large file so the program won't freeze. Coda uses lossy compression, and many users complain that the program lags. In any case, if you don't have a very large file, you can try Coda first. Coda doesn't know how to handle files larger than 1 GB, and it also doesn't know how to handle large videos. All you have to do is add files, save the project and use it.
