Main Features Effortlessly create personalized e-books, magazines or brochures Flip Reader for Mac enables you

to create and export interactive publications and magazines in PDF format and two other formats - EPUB and CBZ - that can be read without having to install any third party app. It supports all FlipBuilder products such as Flip PDF, Flip Corporate Edition, Flip Shopping Catalog, Flip PDF Professional and others, as they all use a FLP file format (a file format developed by Flip). Use the intuitive and yet powerful Flip Editor to design interactive e-books and magazines The intuitive and powerful Flip Editor is

What's New In?

With FlipReader, we can read interactive magazines in different formats, such as ZIP, which contains all the magazine files and FBR, a virtual file format which contains all the data needed to display and navigate through the magazine. You can read and use the interactive magazine created in FlipBuilder with Flip Reader, with no more than a few clicks. Finally, you can import your FlipBuilder projects to FlipReader using FTP (File Transfer Protocol), since FlipReader was designed to be able to read and navigate.v5z,.fbr and.zip format projects. So, if you want to import your FlipBuilder project and read all the pages within a single interactive magazine, don't use the.zip file, use the FBR format instead, as it contains all

the information necessary to read it. You can even store more than one magazine at once, for example, if you want to use one of them as a template, so that it can be used in other projects. This powerful utility also allows you to read e-books and other forms of interactive content, such as:

PDF files: because they are basically the same as interactive magazines, you can read them in the same way.

Mobile e-books: FlipReader is also capable of reading mobile e-books that were designed and created with FlipBuilder. To conclude, our recommended FlipReader utility is a must-have for all FlipBuilder customers.
