AutoCAD Architecture, a 3D-modeling and construction application, is a type of bridge product that extends the functionality of AutoCAD R14 and AutoCAD LT. It is part of the Autodesk® Project Builder suite of tools for creating Microsoft Office applications. AutoCAD Architecture, like AutoCAD LT, R14, is a C++-based application. This is a general purpose CAD software but its scope is restricted to architectural 3D model. AutoCAD Architecture is mainly used to create, edit, view, annotate and modify 2D and 3D drawings. It includes capability to create and

edit 3D models. AutoCAD Architecture can be used to draw, create, edit, view, annotate and modify 2D and 3D drawings. What's New in the AutoCAD?

Design and Build: Improve collaboration for rapid modeling and coordination of concurrent changes from multiple users. (video: 1:36 min.) Increase precision with new point accuracy options. By controlling grid and horizontal and vertical alignments, you can easily create drawings that are precise to the millimeter. (video: 1:24 min.) Orthographic view enhancements: Reduce the number of views required to complete a drawing. New views display parts of the 3D model in perspective, allowing you to make very efficient orthographic drawings by selecting the required view from any of the plan, front, back, and side views. (video: 1:51 min.) New tools for working with the viewports and snapping. Get things done faster and more efficiently, including snap object selection and re-positioning. (video: 1:36 min.) Create your own custom views: With AutoCAD's new features for customizing views, you can create your own views that display just the elements you need to see when you're working with your design. (video: 1:38 min.) Graphics and display improvements: Make colors more realistic by adjusting the color scale. Red, green, blue, and gray are now each their own distinct categories. (video: 1:18 min.) Make adjustments to viewports and snapping faster by making single-step changes to options that may otherwise require multiple steps. (video: 1:15 min.) A new template customization screen: Create custom templates for use in repetitive tasks. Custom templates are made up of reusable graphics and set of command options. (video: 1:47 min.) Create and manage more information than ever before in a single document. Everything from a component list to a topology block makes it possible to easily identify and share information across drawings, parts, and projects. (video: 1:20 min.) A new dialog box: Give your drawings more consistent appearance by

hiding the horizontal and vertical viewports. When you hide the viewports, you'll see only the parts of your drawing that you want to see, regardless of which view you're in. (video: 1:39 min.)
Collaboration and sharing: Visualize and share your designs using AutoCAD 360 technology. With AutoCAD 360, you can add
