Contents show] History AutoCAD was created by Computer Applications, Inc., with the first product version to be released in December 1982. It was initially released for the Xerox Sigma 60 and the Xerox 8010, and later for the Xerox 8075. The earliest versions of AutoCAD allowed users to edit drawings in a graphical mode using the mouse, a technique which became the norm in CAD software. Many of the first AutoCAD customers were architects who were often on a tight budget. AutoCAD became the standard for architectural CAD work and was even the chosen CAD package for the construction of the Space Shuttle. In the early 1990s AutoCAD was adapted to run on the Microsoft Windows operating system. Starting in 1992, versions of AutoCAD for Windows were sold at retail for a price. In 1991 Autodesk also licensed the PostScript-to-PDF technology for both AutoCAD and AutoCAD LT, but never implemented it in the software. In 1999 Autodesk acquired LaserSoft International and integrated their software products into AutoCAD. This combination was popularized under the name AutoCAD LT and continued to be sold by Autodesk until June 2004, when the brand was discontinued. Today, AutoCAD is licensed as a desktop application or as a web-based app. According to Autodesk, AutoCAD's market share increased from 15% in 2011 to 37% in 2016. Usage and accessibility Autodesk and Autodesk Author Services As of July 2019, Autodesk offers AutoCAD free for academic and non-commercial use. This licence is offered through a separate, non-commercial version of Autodesk Author Services. It may be required to activate this free version. Some recent versions of AutoCAD may require a valid credit card and online login to use. AutoCAD Free Edition does not allow downloading of drawings and lacks support for all native AutoCAD file types. For commercial use, Autodesk offers a subscription service called Autodesk Author Services. This service provides access to the latest version of AutoCAD
