Conquer enemies and win the war of the land on your own An epic fantasy RPG, Tarnished, is an action RPG where you are a player who joins in a war to conquer the world. The war between the two great forces is not the main story, and this is your opportunity to win and develop your skills. In this action RPG, the range of skills is broad; you can learn martial arts, magic, and more to ensure that you gain the strength you need to make the best choices. Combat is also set in a realistic world where the enemies are varied. When you enter the battlefield, you can change tactics and direct your attack at the strongest areas of the enemy. The strength of your attacks is gauged by your grade in combat, and the more you gain in it, the more damage you will do. You will learn new skills with the training you have gathered, allowing you to strengthen your skills for the battles ahead. Action RPG Tarnished is an intense game that allows you to play alone or with others, and supports 2-player cross-platform play. Game Features: -An Easy Accessory System that Enables Powerful Experiences The brand-new accessory system allows you to easily collect a variety of items from time to time, including items with their own unique effects. -Concise, Detailed Combat Systems that Lead to Epic Battles During the game, a number of battles can occur simultaneously with ease, and each battle has a feature that unites you with the characters. -Features that Let You Deepen the Gameplay By using the pause feature and customization features, you can change the difficulty of the game. -Multiplayer Combat that Creates a Wide World of Adventure Through the use of multiplayer, you can experience different battles with other characters, and even go on a journey together. -Superb Story that Unfolds in Pieces You will get to know the entire story while playing the game. Furthermore, as the story unfolds, it becomes a vast world of adventure that unites the players. -An Advanced Network System that Supports Streaming You can also try out a variety of fun game modes including the versus mode. -An Atmosphere that Gives You an Intimate Feeling The graphics will make you feel what the battle is like, and the music is superb to give a deep and intense feeling

A: If your issue is about arrow keys not going to the right spot and instead going to far left, there is a solution: Install CanBeCared for any Minecraft issue If CanBeCared is not able to resolve your issue, you can try Optional: In case this doesn't works, try to use a keyboard when using the mouse, and the opposite when using the mouse. Also, check if using a tool like DefaultProfiler is not better suited. Source: Minecraft wiki Q: Angular ui-grid row-select with ui-select-match display I am using the angular ui-grid for my grid. In my ui-grid, the user selects rows. When the user clicks again on a row, the row-select-option appears (it is currently selected). In my ui-select-match "ng-if statement", I have an image which appears if the user clicked on another color in the ui-select-match. I need to also have this image appear when the user clicks on a row since I already have all the needed information to set the row-select-option to active. Anyone see if I am missing something?
