There's been a new release in Japan for the PS3 lately. The thing I'm looking forward to most is getting to play more of the amazing visual novel series "Grisaia". And so I've been playing this and I like it, but it's almost certainly not worth the \$60 pricetag for a PS3 game. There are only 5 hours of gameplay (and counting...) and the storytelling is just mediocre. The gameplay is...ok. I guess. But it's not worth the hype over. The characters all have just...boring...and dull personalities. Even the visual novel behind the scenes wasn't terribly interesting. There are no cutscenes and the voice acting is all seriously low-key. And the game only features one of the two lead characters (Lets just say "Murasaki" since I'm not posting the other one's name until the end). I wouldn't recommend this to anyone as long as you don't mind the price tag. I'd recommend it to people who're curious though. Playing that game was like watching a bad Shakespearean drama (with only two actors playing multiple roles). Kato Rena is the sole female protagonist of the game, but it is ultimately a fairly uninteresting game. She is just kind of left-wing and naturally fated to be saved from her own life and hang around to "rescue" men (just like how Guile from Street Fighter is some odd mix of chivalry and bravado). The one thing that the game does do (apart from reading the game's story), is present the environment (and it is good to go to) when the characters speak in a fashion similar to that of the real Japanese language. Unfortunately, it is not clear at first whether this was for humor or if the game was translated into the Japanese language. A lot of action scenes are a bit too "realistic" or too realistic for this game. The way she is swinging and straining at her fists, or the way she forces herself into a pose and blows off a page of the book by throwing her head back like she is having an orgasm or something, is...really..was disturbing. It may not be something that goes against canon, but it doesn't exactly convey the atmosphere of the scene. Lol Haruto as the bodyguard to the main heroine. He should at least have something awesome like a weapon, or a fighting

What's new:

Join the Swarm Nine young witches live together at a boarding school for supernatural creatures, the Witches' Academy, and two of them may not be human. It's best to stay out of the witches' way, even if they aren't your natural enemy. Two of the witches at the Witches' Academy are less than human. One looks as if he is capable of turning back into a fairy, a possibility he's known but doesn't admit; the other could be forced to do things he doesn't want to think about. As their new roommates, you and your fellow students must decide whether to stand with those who are, or those who are only pretending to be. STORY For four years, nearly three hundred talented students across the world have lived and trained together at a prestigious New England boarding school. Many fear that they have not only committed their own futures to this institution, but their love lives as well. The college-year graduates to some degree or another refer to the time they spent within its halls as the "best four years of their lives," but who can say for certain? Now, for the first time, many of them are about to discover the real world has never been so frightening as the potential they have between them, most especially when two students learn the truth about their relationship with Professor Dewey Dane.
