Space EXODUS is a shooter with a lot of strategy in it. You play in a galaxy where it's every man for himself. There are two main factions: The Alliance and The Nefarious Pirates. The Alliance has equipped its fleet with advanced armors and that makes it almost invincible. In contrast to that the pirates are mainly equipped with armors that are only useful for penetration and have little armor. This makes them weak against fast attacks and inaccurate shots. Your own fleet consists of various fighting vessels. Depending on the situation and your wishes, you can equip your gliders with fast or slow propulsion to travel through space faster. At the same time you can also equip them with extra weapons. This will increase your destruction accuracy and fire power. As a pilot you are responsible for controlling the ships. You must control them with the W, A and S Keys. You must also control the ships to the movement commands so that you can face in any direction. You can also place markers or use orders to make your ships flank or circle each other. You can jump from ship to ship and move between them using the F key. You will be able to take control of the main cruiser with an additional W-key. Then you can fight your enemies from the ground with your laser cannon and heavy armors. The idea behind this feature is to get gamers inside the heads of our creative designers, to highlight little known features, improvements, and ideas that may also be familiar to a broader audience. In this edition of the GD Corners, we look at John's designer process, and how he strives to balance creativity with optimization, in order to create a fun experience in battle. The jacket art features a photograph of DragonForce's bassist Jens Ludwig, and the digital liner notes are presented in a cyan colour, both relating to Black Dice's instruments. Site Contents Why Work from Home? By Lidia J Lucarini - BS/MS, MSP Published June 15, 2017 Work-from-home success is a multi-billion dollar industry. Whether you are just starting out or already working, work-from-home options are everywhere. More options, and more access to new jobs, means many more people are able to truly work from home! The benefits of working from home are many. Some of the most common are the time savings and money savings. Many employees saved thousands of dollars on leaving their full-time position and starting a home-based business. However, the costs and benefits of choosing to work from home are usually evaluated separately. In general, most benefits are considered positive - the main one, of course, is the flexibility, and working from home is known to be a less stressful way to work. Cost-Benefit Analysis Benefits can be experienced in many ways. There are no costs to reduce and no one has to suffer for your new lifestyle. If one considers an appreciative mindset, the benefits can be huge. Whether it is an employee saving 1000 dollars or someone starting an entirely new business and making thousands a month, the benefits are incalculable. Though there are many positives, the negatives seem to be few and far between. While it is generally true that money has a negative connotation (see other articles in this series to see more about money), considering these negatives usually gets to the root of the connotation. So in a cost-benefit analysis, the results lead to a negative conclusion. As we stated earlier, money is the only negative connotation that everyone has when considering the benefits of leaving an office. I did take this analysis much further, and I'll make some of the arguments below to show how it really is not as simple as a "yes" or a "no" situation. Taking into account the money, the people, and the law, you can see that there are still factors to consider. One of the major arguments against working from home is the reliability of internet connections. As we all know, we cannot be sure that our internet will always work, but that is a yearly fact. What about investing in a good router? Again, the problem here is the reliability of the net. It's good to take into consideration the physical issues of taking care of the
