Battle System: Chaos Drives: Battle Faced with the crisis of the Daemons Zola and Duris, the Kingdoms of Elden in the Lands Between are in chaos. However, if the player successfully gathers followers, experiences, and tokens of strength as an Elden Lord, he or she will gain the strength necessary to face and conquer the new threat. The battle system in The Elden Ring is based on a simple opposition attack/defense system. By quickly switching between main character and secondary protagonist, the development of strategies can be carried out with ease. The basic operations during battle include switching between main character and secondary character, selecting an attacking unit, and attacking and defending. The attacking and defending operations are common to all battles. However, when a battle is won, a joyous message will be broadcast, the effects of the operation are displayed, and the player will be granted an item such as a new follower. The following is an example of the battle menu. And, this is an example of the battle map and list of players.
