A portable version of the MSI installer for Windows. Save time and data by installing to a flash drive and run your preferred version of. Report Summary The global standalone gateway market size is estimated to reach USD 6.29 billion by 2025, as per a new research report by Grand View Research, Inc. The market is expected to grow at a CAGR of 8.2% during the forecast period. Gateways provide a stable supply of data to various data consumers through an interface. They are used for data modeling, data analysis, data transformation, and data routing in data centers. With a wide range of tools, gateways provide end-users with the flexibility to manage and process data in a centralized way. Offering a simplified integration to internal systems, gateways provide a cost-effective and efficient way to integrate external data into internal systems. As a standalone product, gateways work without depending on a third-party storage and analysis server, giving the advantage of cost-effective and simplified integration with internal systems. They also provide an end-to-end security for data loss prevention from ingress and egress of data transfer. Moreover, with the proliferation of Internet of Things (IoT) and cloud computing, mobile and web applications are increasing in number, which boosts the demand for gateway products in the industry. In addition, advancements in technologies, such as big

data, Internet of Things (IoT), and mobile devices, have also played a vital role in increasing the demand for gateways. However, data security is one of the major concerns in the data processing market as data privacy is an increasing concern in the industry. In 2016, North America dominated the standalone gateway market, followed by Europe. The U.S. accounted for 29.3% share in the region. The U.S. government efforts to keep up with security breaches in public sector organizations and global concern about the nature of their data are among the factors driving the growth of the data security market. Increasing R&D investment towards smart cities and smart grids and growing number of data and IT solutions in smart grids are key growth drivers in the Europe region. The Asia-Pacific region is expected to witness the highest CAGR during the forecast period. The Asia-Pacific region is witnessing a higher demand for data storage in various sectors, such as healthcare, finance, and telecom, which boosts the demand for data security solutions. The market is dominated by the EMC Corporation,
