## Steinberg Elicenser Crack

UBDL Cubase 5 - Cubase Crack, Keygen & Serial For FREE.Q: Ajax in MVC in long polling I'm an ajax and MVC newbie working on a long polling web app. I've never done long polling before. I would think since my model is being handled entirely by MVC's model binder I wouldn't have to use a jsonp, but it won't serialize my model which is defined as a complex type. Can you guys point me in the right direction?

```
$(document).ready(function() {
    $('#poll').submit(function() { $.ajax({ url: "/Home/Poll", type:
"POST", data: { data: JSON.stringify($("#poll").serializeObject())},
dataType: "json", contentType: "application/json; charset=utf-8",
success: function(data) { alert("Updated"); }, error: function() {
alert("Error"); }, complete: function() { alert("Complete"); } });
return false; }); });
```

My home controller method which handles the post request

```
public ActionResult Poll(Poll poll) { // Do something with
poll here return Json(new { status = "success" }); }
```

A: Check how you can use action filter to achieve your requirement.

```
public class JsonPDataTypeAttribute : ActionFilterAttribute { public override void
OnResultExecuting(ResultExecutingContext filterContext) {
filterContext.HttpContext.Response.AppendHeader("Content-Type",
"application/json"); }
```
