
Sims 3 Pubic Hair HOT!

Unique Hair Type. Separates hair into three parts, the hair that the lice are on, the hair that is between the lice, and the hair on your Sim's head. With this hair type, your Sim can only get lice on pubic hair, and you can take your hand and comb their hair. Uses a lot of GIMP . Sure, you could use a hairbrush to gently and softly kiss the area. But did you know that you can just gently kiss the area, too? So you could be doing your relationship a favor by gently kissing your partner. This is especially true when he or she is in sleep mode. And dont forget your pet! You can lightly kiss them or pet them. If youre looking for more intimate action you can use the anal gland massage mode. The Sims 3's anal gland massage is not as simple as many older games. Its a multi-step process. The second

you go in this mode, the computer is rating you, and your Sim is going to be rated by your computer. You have to wait until your Sim is not rated. Im not sure how long this takes, so for now best to just use anal play when your partner is awake. Pubic hair is, well, hair. Which means its prone to dryness. Especially if your Sim is a cat. Cats are prone to colds and getting those is never fun. To avoid issues, you can brush your pet's fur. And just like humans, you can find an animal groomer to look after your fur. Or you can just deal with it if your cat stays out in the snow. Oh no, your Sims is unkempt! If this happens, use the timer. If your sims hair is over 15 minutes, she will receive a chat in her house telling her to clean up and telling her what happens. If she neglects it, her hair will grow 6 inches extra, all the while giving her a red eye. If hair is between 11 to 15 minutes, there is a warning chat telling her she needs to hurry. If its less than 11 minutes, she will stay just like that. But if hair is less than 11 minutes, she wont get married.

Sims 3 Pubic Hair

Sims can wear custom hairs - and you can make your Sim's pubic area stick out if you want to. Select a thick, short pubic hair for an even bushier look. Or select a thin, long fur for a slimmer line. Create a line of pubic hair down the center of your Sim, or along your thighs. You can have the hair split down the center or leave it together for a smooth look. Before, pubic hair was relatively discreet. Not anymore! Now you can literally have anything you want hangin' down there. If you want to grow a tree of pubic hair, that's do-able too.

Create a thick bush by selecting a large amount of hair and clicking 'Create Hair' to expand it. Click 'Copy Hair' to select all the pubic hair on your Sim. Click 'Copy Hair' again to copy the pubic hair to a new Sim. This is a great way to create a new world of pubic hair -- or just to spruce up your Sim's pubic area. Since Sims 3, the beard has come a long way. You can now make the beard go all the way up to the chin on your Sim's head, or only grow it

on the chin or sides. While beards usually grow faster than the body hair, it will take longer to actually see that beard grow. But here's good news: Sims 4 is in the works, and they're going to give you even more options to create the perfect beard. Cuts the head hair with the previous past, shaved his legs, and shaved his torso. Shaving your Sim will never be more fun! The shorter the hair, the thinner the stubble. A great detail for player Sims who want to be more authentic with their Sims.

Sexually transmitted disease. Sleeps with someone whose Sims have this sexually transmitted disease, while visible with your Sim, another Sim with a soulmate will not be able to see it unless your Sim also has the disease. If your Sims have the disease, there will be a bar notification (when they go on bed and sex) and they will look pained during that segment. Mutes the Sim even if your Sim is not visible. 5ec8ef588b
