
Rpc Plugin Download [HOT]

i downloaded the rpctoolbox from the website and put it into a directory on my hard drive. however, when i try to run the rpc plugin installer from the command line it says the directory doesn't exist. i'm not sure if this is because of a permissions issue or something else. is there a way to fix this without making a new directory? i have to say, having this problem is like being the kid in school that couldn't get into the play because he can't read. either i can't download the file, or i download the wrong file or i simply can't install the file. i have been at this for the past week and have gotten nowhere. i have tried everything i can think of and am at a dead end. i have come here to see if someone else has had the same problem, but i doubt it. i was hoping someone had done something like me in the past. i don't know how this was resolved, but i was hoping that someone could point me in the right direction. i have tried 3 different ways to install the rpc plugin, and have had no success. i have also tried creating a new instance of revit and installing the plugin into that instance. this has also had no success. i am using windows 8.1 and revit 2016. i have tried all 3 methods of installing the rpc plugin. i would really appreciate any help that i can get. i've been trying to figure this out for a week and a half now. so what exactly do i do? i'm trying to download the rpc plugin and install it. but i'm having a few problems. the first problem is that revit won't open. the second problem is that the plugin won't install. i'm using windows 8.1 and revit 2016. i have tried installing the rpc plugin twice. so far, i have not been able to get the plugin installed.
