Raptivity Active Learning is an augmented learning platform that brings together a variety of educational activities. The activities are categorized in three different classes: Scenario Based Learning, Activity Based Learning and Problem Based Learning. Scenario Based Learning allows you to create an interactive experience for the learners. The students will be guided through a given scenario. The Active Learning Mechanism will highlight concepts and facts that

are important for the learners to learn. Raptivity Active Learning is powered by Raptivity Core and is equipped with a number of advanced features that make the platform uniquely immersive and capable of providing the best learning experience. Raptivity Active Learning TurboPack helps to provide a visual and interactive solution for the users to enrich their experience with Raptivity. By using Raptivity Active Learning TurboPack you can present the content with the help of questionnaires, help the learner to achieve information in

a simple and easy way, as well as to share facts with learners in an audio-visual scenario. This video offers you a brief introduction to Raptivity Active Learning TurboPack and some tips to help you get started. The Raptivity Active Learning TurboPack video tutorial provides you with an overview of the following features:

- Multiple input/outputs: the plugin supports audio, video and chat
- Scenario Based Learning and Activity Based Learning: there are a number of Scenario Based Learning and Activity Based Learning models

that can be used to display content to the learners. •

Questionnaire Model: the plugin supports a number of questionnaires to allow the learners to answer to pre-set questions, a list of answers is shown and a feedback is provided

• Multi-Lingual: Raptivity Active Learning TurboPack can be used in different languages • Overload: the plugin provides a number of different interactions that can be enabled at once. For example, you can run a quiz model and a survey model. • The plugin supports a list of Raptivity models. The

models can be activated at once. • Progressive learning: the plugin supports a progressive learning mechanism that allows you to review the whole process from the beginning to the end. For example, you can go through an activity model that can be completed in a certain number of activities. • Workflow Tracking: you can track the user interactions and activities. For example, you can calculate the number of activities per user and see the user performance. You can now upload videos to YouTube, Vimeo or Dailymotion.

You can also import videos from your hard drive and upload

What's New In Raptivity Active Learning TurboPack?

Raptivity Active Learning TurboPack is a useful and reliable plugin that perfectly integrates within Raptivity and provides you

with a variety of stunning interactions in order to achieve comprehension, application and analysis. The provided interactions are cataloged in two categories: Scenario Based Learning and Activity Based Learning. The first category provides you with real-time scenarios and allow the learners to actively participate to specific interaction models. The Activity Based Learning category helps learners to achieve knowledge about a series of facts in a fun and entertainment way. By using Raptivity Active Learning

TurboPack you have the possibility to present the content with the help of questionnaires, help the learner to achieve information in a simple and easy way, as well as to share facts with learners in an audio-visual scenario

LearnBin: E-Learning Software

LearnBin is the first, free software program for e-learning and courseware creation in a fun way. You can make your own games and use LearnBin as your own personalized e-learning software or turn it into an awesome courseware for the school and / or college. With

LearnBin it's super easy to create an amazing e-learning environment by only thinking about the necessary thing: what you would like to learn. With LearnBin it is possible to: Create your own games with a wide variety of tools Turn your web site into a "learning platform" for your customers Create your own courseware in minutes Design e-learning environment for your customers and train them how to use a web site or a program TreeClick TreeClick is a tree chooser for Internet Explorer. Open, select and manage your

favourite websites with TreeClick. TreeClick will show the structure of the website by organizing it into collapsible tree nodes. Open and close the nodes by clicking on them. The nodes show a text and an icon. LearnBin: E-Learning Software LearnBin is the first, free software program for e-learning and courseware creation in a fun way.
