Shakuhachi Tuning Meter X64

- The user has to control the volume of the sound by using the keyboard. - The sound of the virtual shakuhachi which comes from the virtual flute, gives the user a clear idea of how the key must be pressed. - This software is used for the adjustment of the tone according to the actual shape of the flute which the user plays. - Tuning table with up to 5 tone holes is used to set the exact sound of the shakuhachi. - By pressing "Decision" the user can choose whether to set a fixed tone or to calibrate each tone hole. - The user can go from the first note to the fifth note by pressing on the "Next" key. - When you press "Previous" you can go to the first note of the list. - Pressing "Rest" will stop all actions in the software. - You can hear in the sound the absolute pitch and the correct pitch of each tone. - All data are saved in a file of ".csv" format for easy reading and comparison. "I have used the UFT6 because it is a very powerful software. It is very easy to use for beginners. I

hope you can also use this software." (from Japanese guy who bought my software, Thank you!) "I have tried the Shakuhachi Tuner of UFT4 for the first time. The tuning table is convenient to use. At this time I am using it for the first time. But, I hope that you will improve the functionality and usability of the software." (from Japanese guy who bought my software, Thank you!) Features: In order to let you to adjust the sound, you can set the first tone with a key '1', second tone with a key '2', and so on. And, the last key is '5'. The way to set them is the same as tuning a guitar. When you press a key, there will be a sound. If you do not press it, there will be no sound. Data is saved in "CSV" (Comma Separated Values) format, which is easy to read. It is easy to use for beginners. "Hello, I've just bought this software, and i'm just using it for testing." (from Japanese guy who bought my software, Thank you!) "I've been using the UFT4 version of Shakuhachi Tuner
