Melody Composer is a lightweight application designed to help you compose custom ringtones for old Nokia mobile phones. It aims to help you enter the musical notation and quickly convert it into key presses. The ability to create your own ringtone can make your phone stand out in the crowd. Unfortunately, the phone buttons do not display the musical notes and it can take a lot of time to create a song by remembering the notation. The advantages of being portable Since this is a portable program, it is important to mention that it doesn't leave any traces in the Windows registry. You may copy it on USB flash drive or other devices and take it with your whenever you need to create ringtones on the fly. Built-in player The ringtone is created using the computer keyboard and you can listen to it before transferring it to the phone. This feature allows you to experiment with the notes and the beat in order to create the desired effect. Exporting options Lengthier projects can be saved so you do not have to finish your composition on the spot. Any saved song can be used as a template and the program includes a few samples that can get you started. Adding the tune to the phone memory is made easier by the guide included in the program. It displays the buttons that need to be pressed in order to enter the musical notation. You can adjust the time a button press is displayed in the application's window in order to suit your typing speed. Bottom line Unless you know the music notations by heart, the Melody Composer is a must have tool for all the Nokia users that have the option of creating their own

melodies. 5 out of 5 stars from 70 votes. Melody Composer 5 from p2mysterious 4 months ago. I had heard of this app before but I had never tried it. I know it is a pretty good app for Nokia phones that can be used to make ringtones. But I love the fact that you can create ringtones even if you don't know the notation for the note. It also has a built in player where you can hear the song before you add it to your phone. This application is definitely worth having. 3 out of 5 stars from 1 vote. Melody Composer 6 from hmrad 1 year ago. The program is quite good, but it lacks an editor for the notes. It just takes a bunch of ringtones and adds them to the phone. 4 out of 5 stars from 1 vote
