Adobe Photoshop also continued to introduce the ability to further define the DSLR Feel with new features like Lens Flare. Users can now apply this filter to not a single photo, but to every photo in their project at once. I would like to bring the color in her long hair to a brighter purple and add in a few highlights. I would also like to give her skin a bit more life with a few more bright colors. To do this, I would like to transform her skin while keeping the rest of the image the same (Figure 1.6 6). I would like to make her eyes appear more vibrant, "pop." I would then also like to make her hair a bit more pink and introduce a little more green. I would like to create a color transition and a highlight on her skin. I would also like to lighten her face a bit and brighten the rest of her hair.
