Developers who implement your online library can harness the powerful features of Adobe Photoshop. Adobe now lets anyone create an online application that lets members upload images into a library that has its own catalog, rate images, and be graded by other users. Membership to online libraries has no extra cost. Users who are members of an online photo service will see a notification of available library members when they open the service. You can even collaborate with other users on a single image, and draw in and scale assets from the library, then save the result. This is a great way for your team to find great photos, edit them, and share them via a web interface or a mobile app.
