Cracking software usually comes as an.exe file, or a.zip file. When you download the cracking software, you'll want to open the file you downloaded and extract the files. If you are using a Windows computer, the most common extension for cracking software is the.exe file. After you are done extracting the files, you want to run the main file, which starts the crack. The crack will usually have several steps in it, and you'll need to use them in order to successfully crack the software. After you complete the crack, you will have a fully functional version of the software. If you don't need to crack it anymore, you can always uninstall the software and delete the.exe file.
